

# *Star* Solid Carbide Drills and Reamers

Star SU offers a wide range of precision solid carbide drills and reamers.

Our tools outperform competitive designs by our approach of custom-designing your tools according to your specific application requirements. Pressure and Non-Pressure coolant styles are available.

An extensive range of coatings is available from our subsidiary 'Gold Star Coatings' which specialises on highly efficient coating technology. We strive to improve existing coatings even further and add new developments to our existing range of coatings.

The latest addition to our coating line is now available: **AlumaStar**, also known as TiB2. AlumaStar coated drills and reamers are designed to minimize material build up on cutting edges extending tool life.

**Contact us today  
to find out more about our  
program and new develop-  
ments in round tool  
technology:**
